Cybersecurity SIG – Redefined

- SIG changed name from Information Security and Privacy SIG in 2010
- Our action:
 - Redefine the SIG to span Cybersecurity domain
 - Expand our GAP accordingly
- ACT-IAC to then rebrand in the broader community
- Sources for Definition
 - NSPD-54/HSPD-23
 - NIST
 - Others ...

Focus and Techniques for 2011

Potential Focus Areas

- Cybersecurity operations / situational awareness
- Cloud computing / Virtualization / Data Center Optimization
- Continuous monitoring and enterprise risk management
- Identity and Access Management
- Supply chain risk management (SCRM)
- Cybersecurity workforce development / certifications
- Private industry critical infrastructure protection / Smart Grid
- Others

Techniques

- Webinars / Events
 - speaker / panel discussion consisting of government and industry
- Whitepaper / Perspective Papers on an issue
- Proposed ACT-IAC 2011 Cybersecurity Awards
 - Committee nominates 3 organizations/projects in selected domains
 - Recognize emerging best practices, overcoming obstacles, etc
 - Cybersecurity SIG votes
 - Event to announce the winners
- Open to ideas

Call for Volunteers

- Program Chair
 - Coordinate with ACT-IAC on programs
 - Assist SIG members leading programs on process and coordination
- Cloud Computing Cross SIG representative
 - Represent the Cybersecurity SIG at this ACT-wide SIG
- 2011 Cybersecurity Award Committee
 - Lead and members
- Committee Lead
 - Lead a standing committee for a specific domain
- Indicate your interest by contacting Jim Graham or Myisha Frazier-McElveen
